PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

Office Action Summary	Application No. 10/752,208	Applicant(s) SABO ET AL.	
	Examiner Philip Gabler	Art Unit 3637	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 November 2006.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1,3-10 and 21-33 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1,3-10,21-23 and 25-33 is/are rejected.
- 7) ☒ Claim(s) 24 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 06 January 2004 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7 November 2006 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 3-9, 21-23, 25-31, and 33 are rejected under 35 U.S.C. 102(b) as being anticipated by Fox (US Patent Number 676127). Fox (Figures 1-4) discloses a storage container comprising: an enclosure (A) having an open top (at B and C), a bottom (lower portion of A), a first end and a second end (left and right sides of A, respectively) opposite the first end; a first lid (D) pivotally mounted to the first end, the first lid adapted to cover at least some of the open top; and at least one second lid (E) detachably mounted (would be removable with members e, e², etc.) between the first end and the

Art Unit: 3637

second end, the second lid adapted to cover at least some of the open top; and a third lid (also D) pivotally mounted to the second end, the third lid adapted to cover at least some of the open top; wherein the at least one second lid is slidably translatable along the open top of the enclosure between the first lid and the third lid (the lid is clearly slidable and at least portions of it can be between the first and third lids).

4. Regarding claim 3, Fox further discloses the first end comprising a first end panel (end panel of A) and wherein the first lid is pivotally mounted to the first end panel.

5. Regarding claim 4, Fox discloses the first end comprising the first end panel (end panel of A) and the second end comprising the second end panel (other end panel of A), and wherein the first lid is pivotally mounted to the first end panel and the third lid is pivotally mounted to the second end panel.

6. Regarding claim 5, Fox further discloses the first lid adaptable to be pivotally mounted into a horizontal position outside the open top of the enclosure (as shown by the right lid in Figure 1).

7. Regarding claim 6, Fox further discloses at least one of the first lid and the third lid is adapted to be pivotally mounted into a horizontal position outside the open top of the enclosure (see Figure 1).

8. Regarding claim 7, Fox further discloses at least one of the first lid and third lid is adapted to be pivotally mounted in a vertical position outside the open top of the enclosure (the lids would swing through a vertical position between their closed and open horizontal positions).

Art Unit: 3637

9. Regarding claim 8, Fox further discloses the first lid, the second lid, and the third lid are adapted to substantially enclose the open top of the enclosure.

10. Regarding claim 9, Fox further discloses at least one removable sub-container (a) positioned within the enclosure.

11. Regarding claim 21, Fox further discloses the first lid comprises a through hole (viewed as the hole present on the lid mounted leaf of the hinge), and wherein the first lid is pivotally mounted to the first end by a hinge assembly (see left side of Figure 1) comprising: at least one hinge block (viewed as the enclosure mounted leaf of the hinge) having a through hole; and a circular rod adapted to engage the through hole in the block and lid, the circular rod having an axis (along its length); wherein the hinge assembly is adapted to allow rotation of the lid about the axis of the circular rod. [Note that Fox does not disclose specifics of his hinge; however, the members described above are viewed as inherently present in a standard hinge design. See for example US Patent Number 4099347 to Sharp, which discloses a typical hinge with two leaves, through holes, and a pin/rod.]

12. Regarding claims 22 and 23, Fox further discloses the hinge assembly is adapted to allow at least about 180 degrees of rotation of the first lid about the circular rod (see figures).

13. Regarding claims 25-28, Fox further discloses the storage container comprises means (legs of A, the upper portions of which contact the lids in their open positions) for supporting the first lid in an open, substantially horizontal position (as with the right lid in Figure 1), wherein the means for supporting the lid comprise a rod compression

Art Unit: 3637

member (the legs are viewed as rods and would be in compression under the weight of the container as well as lid).

14. Regarding claims 29 and 30, Fox further discloses at least two hinge blocks (see figures) and the first lid comprises a notch (viewed as the notch in the lid mounted leaf of the hinge), and wherein the at least one hinge block is adapted to engage the notch.

15. Regarding claim 31, Fox further discloses the second lid is adapted to slidably mount to the open top of the enclosure.

16. Regarding claim 33, Fox further discloses the first lid, the second lid, and the third lid are adapted to substantially enclose the open top of the enclosure.

Fox '127 Figures 1-4

Claim Rejections - 35 USC § 103

17. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

18. Claims 10 and 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fox in view of Tucker (US Patent Number 4436353).

19. Regarding claim 10, Fox discloses a container as recited in claim 1 but does not disclose a plurality of second lids. Tucker (Figures 1, 3, and 4) discloses a storage container with a plurality of detachably mounted (via their hinges) second lids (12-14). Accordingly, it would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate a plurality of second lids as taught by Tucker in Fox's container because of the additional surface area this could provide while maintaining a compact arrangement when folded.

20. Regarding claim 32, Fox discloses a container as recited in claim 1 but does not disclose a liquid collector. Tucker discloses a storage container with a liquid collector (viewed as the recess in member 12, see Figure 4) in a second lid. Accordingly, it would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate a liquid collector as taught by Tucker in Fox's lid because this would help contain any items or liquids on the surface of the lid and help prevent them from falling off of the edge of the lid.

Tucker '353 Figures 1, 3, and 4

Allowable Subject Matter

21. Claim 24 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

22. Applicant's arguments, see remarks, filed 7 November 2006, with respect to the objection to the drawings have been fully considered and are persuasive. The objection to the drawings has been withdrawn.

23. The remainder of Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

24. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The McClurg (US Patent Number 169651) and Nichols (US Patent Number 169028) references are cited for disclosing various aspects of the invention of the instant application.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Philip Gabler whose telephone number is (571) 272-6038. The examiner can normally be reached on Monday through Friday, 8:30 AM to 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lanna Mai can be reached on (571) 272-6867. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
